Subject: RE: Meeting on assay details Eurofins Genomics SARS-CoV2-qPCR

Dear all,

Please find attached the confirmations that have been performed.

There are some not concordant results from both sides. Always in the higher Ct range, and obviously related to measuring around the LOD of the used RT-PCR assay workflows, extractions included. If these samples were repeated many time I expect that they become positive in only a fraction of the repeats.

I added the curves kindly shared by [redacted] 5.1.2e and our curves for the discrepant results.

For discussion this afternoon.

Best regards,

[redacted] 5.1.2e
