CURRENT SITUATION

GLOBAL ESTIMATED VOLUME:¹

TOTAL VOLUME IN THE NETHERLANDS⁴

CONFIDENTIAL

¹²³⁴ Source: see slide 7

FACTS

Normally the market is **growing by 6-8%** annually

The requested volumes currently are **16x higher** than normal²

A lot of healthcare people wants to have **better medical protection** than before.³

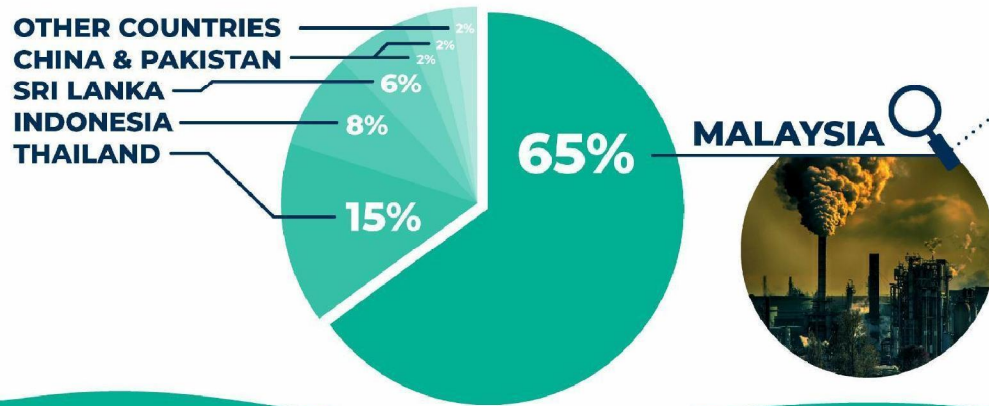

85% of volume goes to **healthcare workers**³

Most of remainder is used in **food and industrial** areas³

WORLDWIDE PRODUCTION

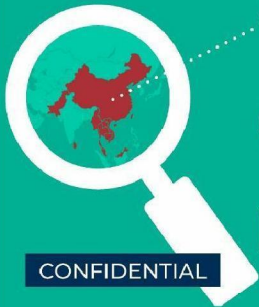

INVESTIGATION

5678 Source: see slide 7

 Biggest suppliers in the World of disposable gloves are **Topglove & Hartalega**, both located in Malaysia. ⁵

 Both of companies are **investigated by US and UK government** due to big concerns about labor rights ⁶

 A widespread of **low-skilled migrant workers** is working in the disposable manufacturing in these countries (like Bangladesh, Nepal, Burma, Indonesia and Vietnam) ⁷

 As the production is mainly (94%) located in South East Asia, it's **risky to be dependent** from these countries.

 Currently all major suppliers are **fully booked until 2022** (and later), with very limited space. That means a **huge shortage** on disposable examination gloves. ⁸

 The Covid-19 crisis has shown us our **dependency** on these production countries.

CONFIDENTIAL

OUR PLAN

PRODUCTION OF DISPOSABLE EXAMINATION GLOVES IN THE NETHERLANDS

-  Raw material (NBR Latex) is **already available** in Europe
-  With our plan we want to get less **dependent from South East Asia**, and make sure we can supply our own healthcare workers on time with the right quality products
-  We want to start with an production of **1 billion pcs** annually as start

THE MOST SUSTAINABLE PRODUCER OF NITRILE GLOVES GLOBALLY

-  We want to use **local sources** for development, raw materials, education and employees
-  Our intention is to have the factory running on **clean and renewable energy**
-  We will use **water treatments systems** for our production process

CONFIDENTIAL

FACTORY FACTS

 The factory will be running fully automatic due to a special designed and developed system. Less labor costs.
Operating **365 days per year, 24/7.**

 A output of at least **2000pcs per minute**

 Our **automatic system** can produce gloves under AQL of 0.4 which is the **best in the market.**

 Approx **35-45 FTE** needed for factory

 Location will be around **36.000 m²**

 Investment through:

- Bank
- Co-financing
- Local and European Grants
- Investors (minority)

OUR FUTURE

WE HAVE **5 GOALS** TO MAKE ONE BILLION GLOVES BY 2022, HELPING US BEING SAFE TODAY AND **PREVENT INFECTIONS TOMORROW**

GOAL 1

To **produce 10% of the global volume** in disposable gloves before 2030.

GOAL 2

To become the **most sustainable** disposable gloves manufacturer.

GOAL 3

If all is working well, we want to **scale up** with our **special designed production machines** to spread the supply chain by opening extra factories in Europe.

GOAL 4

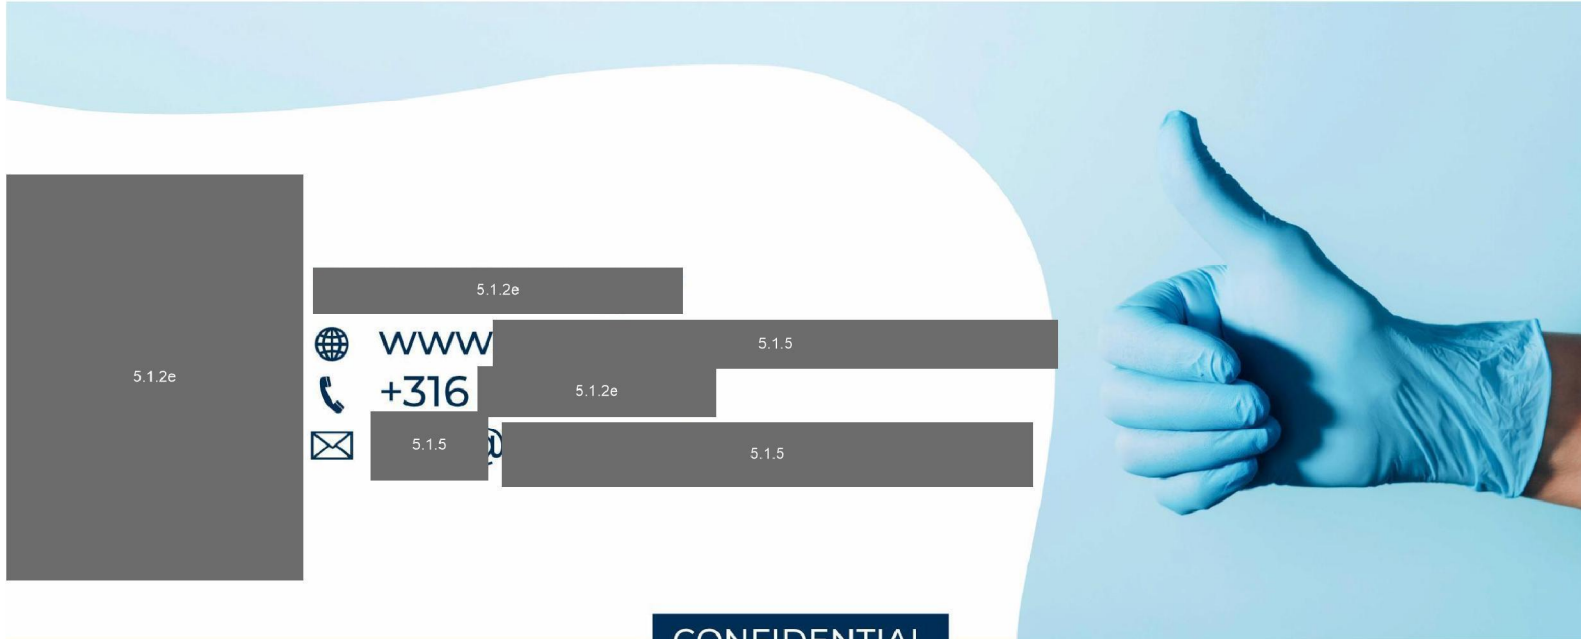

To partner up with environmental organizations and universities in order to develop a **new kind of material** to be more sustainable (we will allocate a part of our profit for this every year).

GOAL 5

To work with Governments, Hospitals and Healthcare distributors in order to **secure volumes** in times of pandemic situations.
