iFlash 1800 and SARS-CoV-2 Kits Being Used for Routine Test in the Virology Institute of Technical University of Munich (TUM)

Antibody testing is getting widely used in the fight against coronavirus

On April 3, the Virology Institute of Technical University of Munich, Germany's No.1 university, officially installed YHLO's iFlash 1800 chemiluminescence analyzer and began routine testing of SARS-CoV-2 (2019-nCoV), reported by the local media.

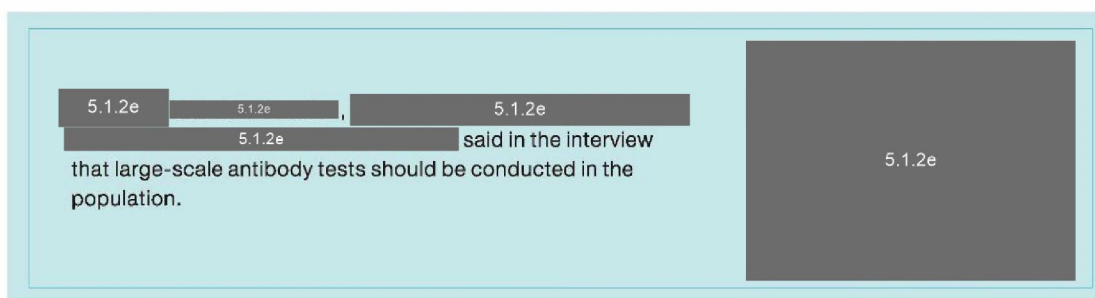

5.1.2e

the Technical University of Munich, gave a positive attitude toward clinical application value of YHLO SARS-CoV-2 antibody testing solution, 5.1.2e believed that key screening and testing of coronavirus should be carried out not only for patients but also for close contacts in medical institutions, and then expand to people in crowded places, such as staff in supermarkets.

5.1.2e

In the early stage, there could be no obvious symptom for COVID-19 patients, large population screening is the only way to find out super spreader. CLIA antibody testing is fast and reliable, which is a good solution for screening.

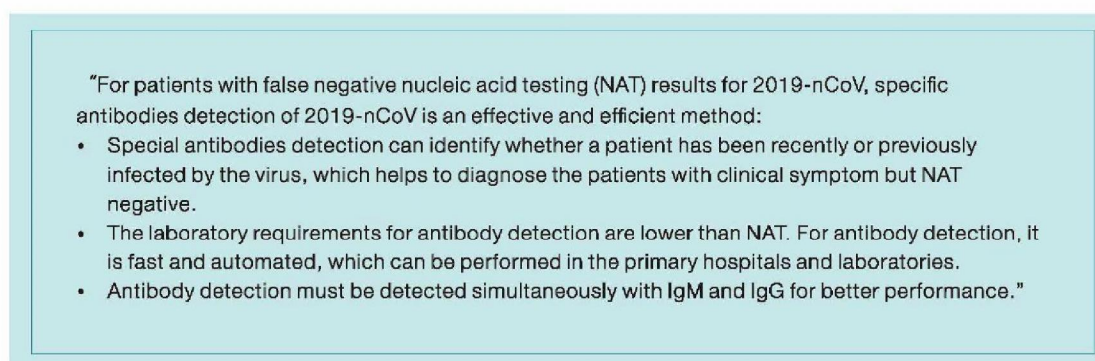

WHO Lab Testing Guidance indicates that, "A single negative (PCR) test result, particularly if this is from an upper respiratory tract specimen, does not exclude infection. Repeat sampling and testing, lower respiratory specimen is strongly recommended in severe or progressive disease...Serological testing may be useful to confirm immunologic response to a pathogen from a specific viral group, e.g. coronavirus. Best results from serologic testing require the collection of paired serum samples (in the acute and convalescent phase) from cases under investigation."

Chinese Laboratory Testing Guide for 2019-CoV indicates, "serum antibodies can be used to aid diagnosis of the status of infection." And the following is expert opinions from

5.1.2e

5.1.2e

Outstanding product performance of YHLO solution for novel coronavirus pneumonia (SARS-CoV-2) detection has attracted a lot of media attention in France, Italy, Germany etc. The solution is a safe and efficient tool in the fight against coronavirus.
