Subject: Feedback on work on Sint Maarten

[EXTERNAL]

Dear [redacted] and [redacted]

A few issues after a VC we had with SMMC:

- AMI staff for CPS and ambulances come to the hospital for Covid testing. In our understanding AMI brings its own on site test, since the contract mentions this. Can you explain why your staff comes to the hospital for tests and do you agree with us that this should be done with the AMI tests? Since there is a problem with testing capacity on Sint Maarten this becomes an issue for SMMC.
- SMMC informed us that you don't follow MRSA protocols with new staff. With the first teams it was accepted since it was a crisis situation. We assume that after working with Aruba and Curacao AMI understands that MRSA spread prevention is very important in Dutch hospitals. Can you work in the same way with SMMC, since it is a burden when SMMC has MRSA positive AMI staff.

Thanks!

Best,

[redacted]
