Subject: testkits SXM
Received: Thur 9/3/2020 1:55:02 PM

Hi [redacted]

We received an order for test kits from the lab of SXM. As you know, these test kits are very hard to get and that is also why you send in a 'bijstandsverzoek' request for assistance for SLS. We are working on it.

But for the main time: As I understood correctly there are two extra machines already purchased, which will arrive in a couple of weeks. Can you tell me when exactly the machines will arrive? And how many test kits you have atm and more important; how long you can test with this amount of available test kits? (assuming that the situation remains the same).

Thank you!

Kind regards,

[redacted]
