Hi all,

Thanks for sending the presentations. I merged the slides and did the following order:

I thought it would be good that 5.1.2e goes in the beginning, because some others used the 5.1.2e data, and the studies that are in the data collection phase at the end. To my current knowledge, only 5.1.2e will present digitally via gotomeetings.

Subject: FW: EPI refereer covid update flitspresentaties aanstaande donderdag

Dear all,

Thanks for your willingness to give a short-talk about COVID-19-related work at the refereer of tomorrow (17 september).

Some details:

- We will start after centrumoverleg, probably around 13.00, but would be good to be prepared if we can start earlier.
- The presentation is short (3-5 slides), and the language is English
- Please send me the slides today, so I can merge them to one presentation. If you cannot make that, please let me know as well.
- The meeting is partly physical in T0.12, so if you are at RIVM, you can come to this room to give your presentation.
- If you want to present from home, you can make yourself the presenter in Gotomeeting when it is your turn, so please have your slides ready on your own laptop (and shut down private stuff that should not be displayed). I still would like you to send me your slides today, so I know the order of the presenters during the session and if there are some technical issues to make yourself a presenter, I can click through the slides for you.
- If you have not tried presenting via Gotomeeting before, or if you doubt about your sound quality etc, please let me know asap. We can test it today if you like.

Please let me know if you have any further questions.
