Hi 5.1.2e

So indeed, after giving it some more thought, it mostly is an issue of having three additional days to become infected with SARS cov2 before leaving.
Best
5.1.2e

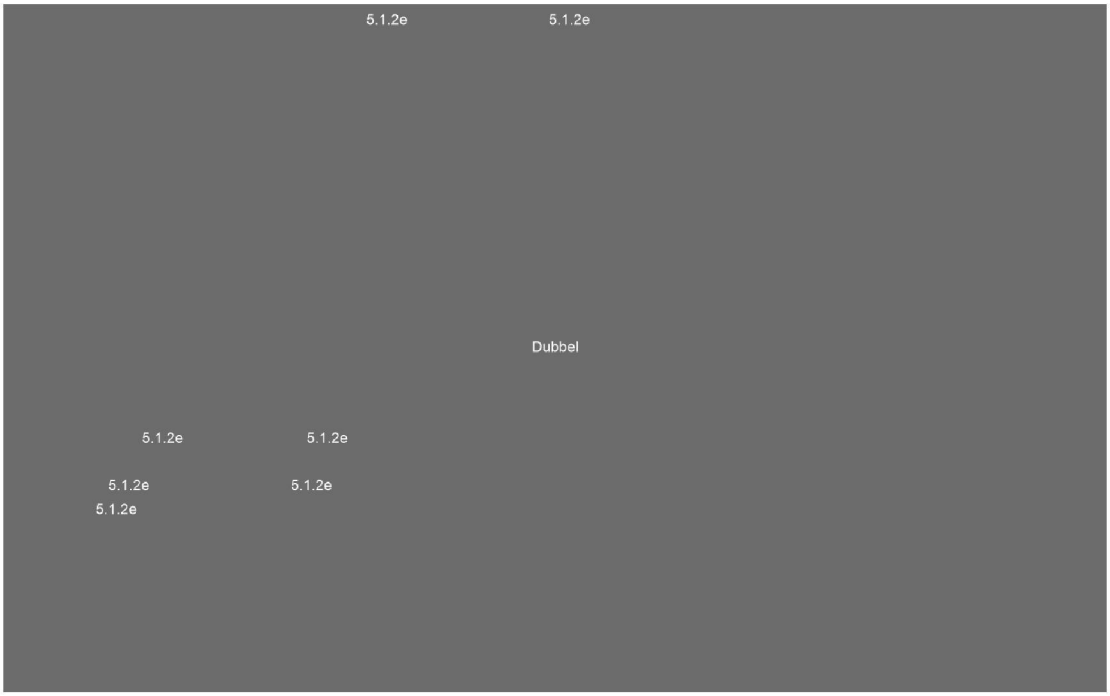
Hi 5.1.2e

Thanks. Indeed we had the same thought; that the increased risk is linked to the 2 additional days of potential exposure prior to travel.

SXM is currently testing incoming travellers at the airport who have an outdated or no PCR test result. 5.1.2a
5.1.2a


Best wishes,
5.1.2e
