Hoi [redacted] 5.1.2e
[redacted] 5.1.2e wil geen AMI.
Wij gaan gewoon door met plan SLS.
Groeten,

[redacted] 5.1.2e

Onderwerp: RE: Testing SXM

Dear [redacted] 5.1.2e

The equipment is leased as a package deal and includes the following. My apologies that it was left out of the summary.

Exiprep 96 Lite High- Capacity Nucleic Acid Extraction

Exispin Fully Automated Spin Vortec Spin Technology

Exiprep 96 Viral DNA/RNA Kit

The equipment and personnel can be delivered within 7-10 days, and I believe [redacted] 5.1.2e is working to find suitable housing for the equipment.

Best Regards,

[redacted] 5.1.2e

Director, Commercial Operations

Subject: Testing SXM

[EXTERNAL]

Dear [redacted] 5.1.2e

In reaction on the testing proposal, we have some technical questions. Can you please try to clarify?

- If we look at the equipment then there is only a cyclor included. Not included are machines for DNA/ RNA extraction and software and other equipment for processing the samples. Can you explain this?
- At present the SLS building is not equipped with a specific working environment (special rooms) to run molecular diagnostic services. Is it realistic to expect that a lab could be up and running in one week at SLS?

In the meantime are still waiting for the response of CPS, but maybe answers on the above help ☺

Thanks in advance,

Met hartelijke groet,

[redacted] 5.1.2e
