Beste allen,

Bijgevoegd het verslag van de HSC audio meeting van 14 mei en de input geleverd door NL. Aan alle actiepunten voortkomend uit deze meeting is inmiddels voldaan, er zijn dus geen openstaande actiepunten. Onderstaand een samenvatting van de belangrijkste punten:

1. Package on travel and tourism, travel advice

The commission (DG HOME, DG MOVE & DH JUST) presented the different components of the tourism package to the HSC (bijgevoegd). The principle of non-discrimination in applying the measures was emphasised. Countries noted the importance of considering the different epidemiological situation in each country, and competitive needs for tourism. The importance of defining criteria for indicators beside transmission rate, such as free hospital beds, ICU capacities, as well as looking at regional level data was noted.

- Follow-up: The HSC will continue to discuss and assess exit measures or any important updates regarding borders, tourism and transport.
- FOLLOW-UP: ECDC is working on guidelines and epidemiological criteria for the safe reopening of tourism and transport. Countries to submit regional level data for the building of the ECDC map and for allowing to perform a reliable assessment of national and subnational epidemiological situations.

2. Exit strategies

DK, FR, NL, NO and the UK provided an update on de-escalation measures. An elaboration on de-escalation measures was provided by MS in the exit strategies table (bijgevoegd).

3. Vaccination plans for COVID-19

The Commission provided an update on the videoconference of the health ministers on 6 May, where many countries noted strong support for mandating the HSC to prepare a COVID-19 vaccination plan for the EU and EEA, as well as expressed an interest in possible joint procurement of COVID-19 vaccines.

- FOLLOW-UP: The HSC expressed support to develop an EU vaccination plan and will discuss this in more detail in the next meetings.
- FOLLOW-UP: Countries were reminded to send feedback on questions related to COVID-19 vaccination. An assessment will be presented in the next HSC meeting (voldaan, bijgevoegd)

4. Contact tracing and EWRS process

The HSC supported the proposal from SANTE regarding the use of a standard template to exchange information on contact tracing using EWRS, which countries find useful and provided technical comments regarding.

- FOLLOW-UP: The HSC was asked to send any further comments in writing, as well as to revert on good practices on scaling up contact tracing capacities (voldaan)

5. AOB

- Potential candidate countries participation in the HSC: The Commission asked the HSC on granting observer status for potential candidate countries in the HSC. No objections were raised by the HSC.
- Kawasaki-like disease in children with possible connection to COVID-19: Cases were reported by several countries. ECDC prepared a rapid risk assessment, which was shared with the HSC and via EWRS (bijzagevoegd)

Groet, (10)(2e)
