Thanks (10)(2e)
 I see no reason why not.

((@ (10)(2e) and (10)(2e) 've added these papers to our overview of [EpiPose's scientific output](#))

Best regards,
 (10)(2e)

Dear (10)(2e), (10)(2e) all,
 Thanks for sharing the paper. This looks very useful.

I forgot to mention a manuscript from some colleagues at the University of Bern to which I have contributed (see attached PDF). It is a relatively simple modeling exercise about dynamic control interventions with intermittent reductions of R below 1. We illustrative the effect of such interventions for 16 countries with different ICU capacities.

The paper will be published in the European Journal of Epidemiology next week. Let me know if it is okay to add the EpiPose funding statement for the final publication (it's already in the manuscript).

Best,
 (10)(2e)

Hi (10)(2e)
 Thanks for sharing. I think it makes sense to include this as EpiPose output.

Unless anyone else objects, please include one of the following funding acknowledgements:

This project has received funding from the European Union's Horizon 2020 research and innovation programme - project EpiPose (grant agreement number 101003688).

or

Authors (insert initials or names of relevant authors) acknowledge funding from the European Union's Horizon 2020 research and innovation programme - project EpiPose (grant agreement number 101003688).

Could you also send me a MedRXiv link once it is available?

Best regards,

(10)(2e)

Dear All,

We have just completed a manuscript on contact patterns after the lockdown measures in the Netherlands. The setup is slightly different from the Ipsos surveys we have in this project. We use the random sample of the population, as used in serological studies, to ask a retrospective question about number of contacts and their ages. We have also done a similar study with a similar question in the same population in 2017. This set up allows us to have a complete age range, and a good baseline. The conclusions are more or less in line with the earlier findings in the UK.

I am emailing this to you to see if this manuscript could count as output of the EpiPose project. We would like to submit it as soon as possible and would appreciate a quick response, please let us know today if you object.

Best,

(10)(2e)
