Subject: FW: Support for nCoV laboratory diagnostics by SHARP/EMC

Dear SHARP partners,

For your information, please see the message and link below from our Spanish colleagues.
 The European Commission is opening a call on coronavirus research under Horizon 2020.

https://ec.europa.eu/info/news/coronavirus-eu-mobilises-eur10-million-for-research-2020-jan-31_en&pk_campaign=rtd_news

Advancing knowledge for the clinical and public health response to the 2019-nCoV epidemic

ID: SC1-PHE-CORONAVIRUS-2020

Type of action: RIA Research and Innovation action

Deadline Model : single-stage

Opening: 30 January 2020

Deadline: 12 February 2020 17:00:00 Brussels time

Budget (EUR) (10)(2e) - Year : 2020

At this stage, THL has probably no capacity to join this initiative but if you are planning to take part, please keep (10)(2e) @thl.fi copied.

Kind regards,
 (10)(2e) team

Dear (10)(2e)

First of all, thank you very much for your email.

I contact you regarding the urgent call that the EU has launched regarding the CORONAVIRUS:

(10)(2g)

(10)(2g)

We wonder if you or some of the partners of SHARP are thinking to apply as coordinator in that call. We are positive that the expertise of the SHARP consortium can link perfectly with the scope of the call.

We think that SERMAS can be an important partner in this matter with our huge and solid expertise in this type of emergencies (EBOLA, Crimean-Congo fever, etc).

Please, if you know any possible potential coordinator, put in contact with us in order to try to participate in the proposal.

Thank you very much for your help and we are looking forward to hearing from you soon.

Best regards,

(10)(2e)

Dear SHARP partners,

Diagnostic assays for the detection of 2019-nCoV has been published and many of the SHARP partners and Member States have set up the diagnostics already. There are also mechanisms, e.g. through WHO, to send the samples to the reference laboratories for detection if needed.

SHARP wants to support its partners and MS as well. Our SHARP partner, (10)(2e) (10)(2e) from the Erasmus MC has kindly offered their help in this, by providing real-time RT-PCR for detection. If you have suspected cases of 2019-nCoV and need support for the detection, you may send your samples to the EMC. SHARP will cover the costs for shipment of the samples if needed.

For sample types, shipment and more information: Please contact directly (10)(2e) (10)(2e) (10)(2e) @erasmusmc.nl) or (10)(2e) (10)(2e) @erasmusmc.nl).

If you wish to get compensation for costs of shipment of the samples, please contact THL ((10)(2e)@thl.fi) and check whether this needs to be added into the current amendment.

Kind regards,

(10)(2e) and (10)(2e) team
