Dear all,

Please find the attached report for the literature review on Gomes et al. (2020) medRxiv.

<https://www.medrxiv.org/content/10.1101/2020.04.27.20081893v3>

I received comments on my first draft from some of you, and those points are reflected in this version.
(Mainly, too technical points were excluded.)

If you have comments and could give feedback by next Monday (9 November), that would be very appreciated.
After finalizing it, (10)(2e) will kindly help to translate the document into Dutch.

Best regards,

(10)(2e)
