Dear (10)(2e)

this is to introduce myself as the head of the laboratory medicine at the Stuttgart Clinic, Germany with (10)(2a) beds.

We have been offered the SARS-CoV-2 Assay from (10)(2a)
(10)(2a)

With great interest, I have read your paper "Comparison of seven commercial RT-PCR diagnostic kits for COVID-19", in this context I would request you to please tell me which settings were used for the (10)(2a) assay kit on the lightcycler 480 and what is your opinion on the (10)(2a)

Many thanks for your kind help.

With kind regards
(10)(2e)
