Subject: RE: Go.Data use for COVID-19 contact tracing in the EU/EEA and the United Kingdom

Importance: High

Apologies for the double email, you can find below the same contents with the date corrected and the tele-meeting dial in details.

To: NFP Preparedness and Response; OCP COVID-19

Dear colleagues,

WHO-GOARN has developed a tool, named [Go.Data](#), for outbreak investigation, contact tracing and follow-up, and visualisation of transmission chains. You can find a brief presentation of the tool in attachment and [here](#) is a recording of 1h30 from a recent briefing on its use.

We think Go.Data has the potential to make contact tracing more effective and efficient in the current COVID-19 event.

ECDC is inviting you to a tele-meeting tomorrow, **Thursday 5 March 2020, from 15.00 to 16.00** to present the tool and provide information that could facilitate the use of Go.Data in your country in the response to COVID-19. Apologies for the short notice, we have received requests from different EU Member States and we want to address this as soon as possible.

During the tele-meeting we plan to go through:

- a presentation of the tool by WHO focusing on use for COVID-19 outbreak investigation and contact tracing [WHO]
- a brief legal perspective on the use of the tool with regards to GDPR [ECDC]
- discussion and questions

Please find the tele-meeting dial in details at the bottom of this email. Thanks for joining few minutes before 15.00 and for muting your line to avoid background noises.

We will invite you to give us feedback by the end of the week on whether you are interested in using Go.Data. Please do not hesitate to contact us, should you have questions in the meantime.

Kind regards,
Response and Emergency Operations Group, ECDC

When it's time, join the Webex meeting here.
