Our ref.: COVID-19, PHE Support

Dear Colleagues,

Subject: SARS-CoV-2 diagnostic assay validation data sharing

ECDC would like to express its gratitude for the excellent collaboration with your institute regarding the sharing of COVID-19 diagnostic performance data. These data are very important at the moment for decision making within the European Union and Member States, and we have received them from you both timely and in great detail. This includes also data from other laboratories provided through your institute, which we greatly appreciate as well, and hope that this data sharing can continue in the future as long as it is relevant for adequate management of this COVID-19 crisis.

Yours sincerely,

(10)(2e)
