Dat kan, maar dan kloppen andere dingen niet zoals de aantal patienten die nog opgenomen zijn...

**Subject:** RE: Update case register

I talked to (10)(2e) and she is sure about the amount of deceased persons (n=13), but she couldn't indicate yet which patient it was. Is it possible to adjust it by hand?

Regarding the hospital admissions, she is also not sure and said that communication about number of hospital admissions is not really reliable/transparent. The app last night said 7, so maybe keep this number? However, she was certain that the patient from (10)(2a) was already discharged.

Hi (10)(2e)

Thanks! Do you have any more information on these cases? I'm just about to generate the report now and can input this information directly into the report if you have it.

**Subject:** Update case register

Hey (10)(2e)

Attached the updated case register for the week 18 EPI report. I am still trying to get some more info from sxm. On WhatsApp they say 13 deceased persons but I only have 12 in the case register. Also they are daily switching between 7 and 8 patients admitted to the hospital. Either they have a rather continuous flow of admissions or they are confused about the French side patient and whether they count him in or not.

Let met know if there are any questions. Thanks!

Best,  
 (10)(2e)
