Hi (10)(2e),

I had a deep look into the online case questionnaire and the control questionnaire. All the questions seems to correspond and I've made the changes in adding the question regarding plant and I re-numbered the questions as well.

One point is not clear to me, question 84.76 and 85.77 in the case questionnaire are not in the control questionnaire. Do you think that this should be added?

I have a few meetings now...it will be later in the afternoon.
I am checking all the questions with the case questionnaire, and check which ones overlap.

CaseQ1= ControlQ1
CaseQ2= ControlQ2

Hi Barbara,

Here it is : +33 (10)(2e)
I'm ok with you suggestion on the question, I will put the routing.
Best,

(10)(2e)

Hi (10)(2e),

Can you send me your phone number again? I lost it again ;-(

Regarding 3rd question
 * Ik doe graag mee aan dit vragenlijstonderzoek (als controlepersoon)
 Ja
 Nee

If a person answers no, there should be an action to the end of the questionnaire.

Subject: Re: FUSACA control questionnaire

OK, looks like everyone is ready to finish this by today. Cool!

I have a correction for the translations: the hand disinfection question should be asked in april as well, we want to know whether people changed their habits.
