**Subject:** RE: Update of Annex 1 to SD 2020-01 issue 14

**Received:** Tue 6/2/2020 12:21:32 PM

Allen,

In tijdelijke waarneming van collega's die een welverdiende vakantie hebben stuur ik jullie hierbij het gestuurde commentaar aan EASA:

Dear (10)(2e)

thank you for the update of Annex 1 to SD 2020.

I would like to highlight that the oversight of available date sent by the Dutch National Institute for Health and the Environment (RIVM) and -in addition to the data used by the ECDC and the WHO- the link to NICE data points towards a very low local transmission rate. We believe that based on all the available data more than sufficient evidence is available that would justify the airports in the Netherlands be erased from the list of high risk airports.

The Dutch National Institute for Health and the Environment (RIVM) has contacted EASA this morning for further insight in the decision and the data it was based on, to exclude an omission or needless negative decision.

We thank you for your consideration of these arguments,

Kind regards,

(10)(2e)
