Hoi,
 Sorry, goed dat je vraagt - dit is even blijven liggen, ook omdat er nog niet veel respons van andere partijen kwam (van Italie kwam een antwoord en van iemand anders, zoek ik later nog op).

Groet

(10)(2e) [redacted]

Subject: VEO WP8 - questions about availability of data and pyramid surveillance

Dear VEO PIs and WP8 group

I hereby as agreed circulate a first questionnaire regarding availability of data for surveillance of silent epidemics in the context of all the recent COVID-19 interventions. This will decide which cities we target for the future.

Please read and fill out at least table 1 and return ti to me no later than **Tuesday next week**.

The questionnaire includes:

1. a description of the planned studies in WP8 that is now re-directed to capture the COVID-19 interventions,
2. an overview of where we do have ongoing sampling of sewage taken place
3. Table 1 – a questionnaire regarding which data you know we can get access to and be allowed to use
4. Table 2 - an initial overview of potential epidemiological drivers, where I would like you to suggest new drivers, as well as which data you can provide

Fell free to include more VEO-partners if I have missed some in this mail.

PLEASE – keep the subject header in your replies.

Sincerely

(10)(2e) [redacted]
