[20200423 WASH v2final - updates KM.DOCX](#)

Hi,

One point I forgot on the bathing waters.

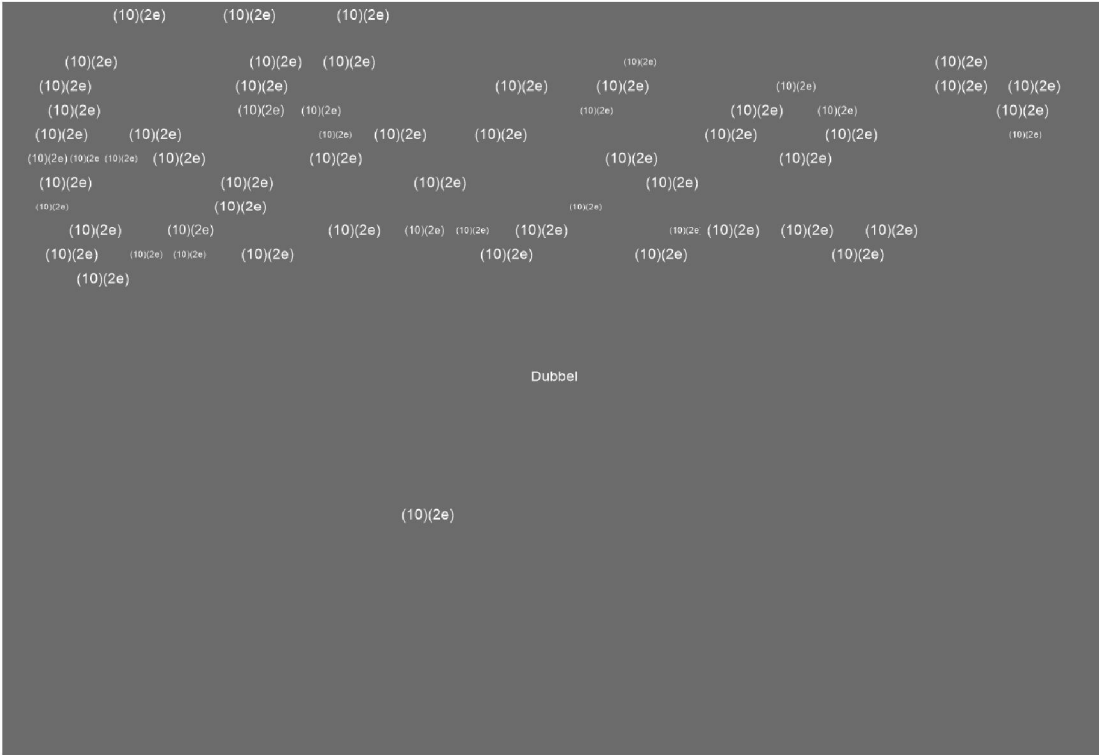

On the bathing waters we have many discussions on guidance to MOH, MOW and different stakeholder organisations with respect to e.g. crowding but also on the chlorine concentrations in pools e.g. for urinary and fecal accidents (which I think should be mentioned as to be avoided; one could recommend to use swimming diapers in case of babies or other incontinent people). I copy in (10)(2e) because she is our PI on this and knows all the details and you may want to liaise. (10)(2e) see the very end of the advise on page 7.

(11)(1)

Bye for now,

(10)(2e)

Dubbel

(10)(2e)
