BVI testing strategies_Working draft 18-11-20AN comments 5.1.2e 2.36pm.docx

Hoi 5.1.2e
Zie onderstaand de reactie van onze collega op BVI.
Op de eilanden is blijkbaar niets bekend over een uitwisseling op Statia.
Hoe zit dit precies, vanwaar deze vraag? Graag jullie reactie zodat we e.e.a. kunnen afhandelen.
Met vriendelijke groet,

5.1.2e

Goodday 5.1.2e

Here is our testing/quarantine/isolation strategy.

We are tweaking recently with more recent advice with regards to handling persistent positives and recoveries.

Generally speaking persons who have laboratory confirmation of previous positive and recovery who test positive by PCR with high CT values over 33 are considered persistent positive and cleared and treated as negative.

I reached out to the local Basketball Association and they were not aware of a team travelling to Statia. They will research and revert to me.

Best regards

5.1.2e
