[BP ibi Vaccine Management E-book 2021.pdf](#)

Hello [redacted].

I wanted to share the attached eBook with you as I thought it may be of use going forward.

The contents is targeted for organisations involved in the production, distributions or administration of the Covid-19 vaccine and hence why it will likely be of value.

It was initially birthed out of an initiative with Blue Prism and a partner organisation in the United States but it has also been used in the UK and will similarly be useable in the Netherlands as well because Dutch is a compatible language on the Blue Prism platform.

The usage of a digital workforce in this manner can, to give a select few examples:

- Monitor dashboard and provide reporting - both for vaccine roll-out and Coronavirus case tracking.
- Manage vaccine requests from citizens.
- Check current medications against vaccine reactions.
- Contact and organise with citizens for vaccination opt-in.

We would be happy to sit down with yourselves and discuss how this is best applied and being used to-date so as to rapidly get this set-up and working - should there be an opportunity for it.

Let me know how best to arrange an initial connect call if so.

Best regards,

[redacted]
