Denk dat het volgende voldoende is:

The Netherlands strives to vaccinate at least as many people in the target group, "people over 60, people under 60 with for Covid relevant underlying conditions and their care givers, before the summer.

We support all additional vaccine purchases that support this target.

At the same time we should be aware of the large numbers of vaccines we potentially acquire and the ways we could make these numbers work for people elsewhere in the world as well.

Iets meer body & vragen.

[REDACTED] wil jij de tekst iets aanpassen?

[REDACTED] voor input op vraag 3 zijn we denk ik vooral van jou afhankelijk, of weet [REDACTED] dit?

- 1) Exchange of views on the roll out of the vaccination plans, including any lessons learned from the first days of vaccination;
- 2) Discussion on the state of the monitoring systems in place of administration of the vaccines;
- 3) Exchange of views regarding ongoing and planned EU contracts for additional doses of vaccines.
