Hi 5.1.2e
I hope I'm not too late. I thought it was meant for Monday, wasn't it? I have a couple of minor suggestions. In general I think it is clear and it answers the questions that were asked.

Subject: RE: draft response to question from the ministry of health

Dear all,
Thank you for thinking along and providing updated figures on such a short timescale. Here is a new version of the document with the answers to the ministry of health. I have not included all material that was provided, I hope to include it in the final version. Please correct the technical bits (not sure about the precise methods of 5.1.2e burden calculations), and feel free to correct the text when needed.
Best
5.1.2e
