

PROMISE

WP1 [RSV burden and impact of COVID-19 on RSV]

- To conduct **literature reviews** (RSV burden in pregnant women, severity scores, standardizing clinical outcomes for RSV therapeutics, naïve and non-naïve population, impact of COVID-19 on RSV including historical impact of H1N109pdm on RSV)
- To estimate RSV burden estimates in healthcare settings in post-COVID-19 and compare with pre-COVID-19 estimates using linked data analysis (RESCEU 2.1)
- Modelling impact of behavioral intervention on RSV burden and healthcare utilization
- Model impact of COVID-19 on RSV seasonality

WP2 [Preparation of future RSV product assessment]

- Method and background information in preparation of post-marketing evaluation (including defining clinical endpoints)
- (10)(2a)
- Promote Patient Engagement Activities.
