

- @all, Please read the draft and the official 'call for proposal' (I also attached here), then give me your comments. I created a surfdriive file for this project [https://\[REDACTED\]](https://[REDACTED]) (10)(2g) you can also uploaded your revised version there (but do not overlap existing files).
- @ all, I propose we have a meeting as soon as possible to discuss the draft and certain questions regarding the budget. Here is a doodle link [https://\[REDACTED\]](https://[REDACTED]) (10)(2g) Please add your availability.
- @ all, do we have any co-financing for this project? This includes not only cash, but also the investigation on time and data. If so, please let me know. According to the call for proposal, it will increase possibility of acceptance.

- @ (10)(2e) (10)(2e), (10)(2e) and (10)(2e), to submit our proposal as co-applicant or partner, could you please check is there any specific administration process needed within your institute? If so, can you inform me as soon as possible? Especially, about an estimation on how much time you need to finish it.
- @ (10)(2e) and (10)(2e) I have contact with (10)(2e) (who is the funding officer in our faculty), she will take care of the necessary administration within UU (like the approval). If you have any specific requirements from your department, please also let me know.

Thank you so much for reading this long email and give your inputs (thanks (10)(2e) and (10)(2e) for helping the draft). Look forward to your response!

Best regards,

(10)(2e)
