(10)(2a)
[PROTOCOL FOR INTERNATIONAL PATIENTS.pdf](#)
[SARPA.pdf](#)

moeten we dit nogmaals brengen in ministers overleg?

Twee risico's nl veiligheid patiënten en verstoring ziekenhuisplan. Als coomeeva dit nu zo bij ons neerlegt dan worden de amderen ook benaderd. Vanuit (10)(2a) werd gemeld dat toch nog aantal uitzendingen naar (10)(2a) zijn gegaan.

We hebben net bij beide ministers aangegeven dat het essentieel is de verzekeraars aan boord te hebben bij ziekenhuissamenwerking. Maar misschien betekent het meer als het van (10)(2e) komt.)

Volgens mij recent zelfde boodschap aan (10)(2a) gegeven, over die 50 patiënten die SZV naar (10)(2a) wilde sturen (info van de ambassade).

Met vriendelijke groet,

(10)(2e) (2e)

Onderwerp: Reopening of flights in (10)(2a)

Dear all, hope you are having a good day and that everyone is in good health as well as your families.

As (10)(2e) mentioned in a previous email, at this moment I'm in charge of the medical direction of (10)(2a) and I want to let you know that from September 21, international flights will be reactivated here in (10)(2a). In relation to this topic, I want to share with you a summary of the indications of the (10)(2a) government so that patients can travel and other important general information:

- Charter flights with the Caribbean islands have been authorized if the airline complies with all protocols.
- The biosecurity protocol required by the national government of (10)(2a) has already been released, where they explain what the requirements are for someone to enter the country. (I attached to you, is in Spanish, is the original document that the government took out, below I will explain the general requirements for patients to come)
- Hospitals and clinics are prepared to receive patients.
- Once the patient travels, both the airline and the ground transportation and hotels are all coordinated to comply with all biosafety protocols and avoid the risk of patients as much as possible. (Also I Attached the protocols that we have developed with them.)

- We will try to do the entire process of the patient in the shortest possible time so that they can return promptly to the islands.
- During their stay in (10)(2a) the patients will have a Protection Kit, permanent mask and the patient will be educated so that they always avoids exposing themselves, going out only to the appointments, and basic needs, but otherwise the recommendation is to stay in the hotel following all biosecurity protocols.
- Once the patient is able to return, we ask you to inform us what requirements are on the part of your government so that the patient can re-enter the island and travel.
- It is recommended that only people who require it, such as minors, people with a disability for their self-care, travel with a companion, and avoid that the companions are not older than 55 years.

The requirements of the (10)(2a) government for a person to enter and leave the country are the following:

- Each person who is going to travel: **the negative SARS-Covid PCR test is required** with a time no longer than 96 hours (4 days) before the flight.
- From the day the person takes the test, they must guarantee to stay in preventive isolation until the day of the flight.
- If the person has a fever or respiratory symptoms associated with covid-19 on the day of the flight, they will not be allowed to ride on the plane.
- We must register 1 day before the flight information on each patient on two web platforms about their health status and carry out a migration procedure. (In these two records, we are requesting that we can do them by means of a general template that we fill in the day before the flight so that everything is more agile and easy, once we have a response to the request, we will let you know)
- The use of face mask is mandatory at all times for each patient.
- On the day of the flight, the patient must arrive at the airport at least 3 hours in advance.

With this information that I share with you, please I hope you can read it, if there are any doubts you can ask me that we will gladly solve them.

In addition, if you have needs such as a lack of facemasks for the flight, or you don't have a sufficient amount of covid tests, we can talk to know how we can help you.

We are at your service for everything you need.

We will be very attentive for your response, and the needs you may have,

Best regards and be safe ,

Dear (10)(2e)

Hope you are having a great day!

Thanks for your answer, I am glad to hear also from you!

It is a very good sign, also because we have been able to help patients in acute situations.

Patients we had received are from (10)(2a) (10)(2a) and (10)(2a)

The situation is still very difficult in (10)(2a) only non Covid patient.

We could do a survey on how ICU's are at the moment but as you know this varies day to day, but how we've been working with our network is as usual we present our patient Covid free and afterwards if there is capacity @ICU they have received our patient.

Please let me know your comments and stay safe

Cordialmente,

(10)(2e)

Hi (10)(2e)

I agree with (10)(2e) were these patients from ZVK or (10)(2a) / (10)(2a) / (10)(2a) or maybe another country?

Opening the borders for humanitarian flights is positive, in itself. Are the borders open for Covid patients as well, or strictly non-Covid? And do you have any idea of ICU capacity (non-Covid and Covid) of the different hospitals?

Stay safe,
