[Review influenza vaccine and COVID-19 2020.09.10.doc](#)

Dear (10)(2e)

In the light of the Woolf paper in Vaccine (<https://www.ncbi.nlm.nih.gov/pmc/articles/PMC7126676/>), Saverio and a colleague in Italy have performed a literature review on:

'The association between influenza vaccination and the risk of SARS-CoV-2 infection, severe illness, and death'

We wondered if you would like to review the article and become a co-author? The results are interesting and the finding that influenza vaccination is often protective surprising. We have not dwelled on this point in great detail in the Discussion, but if you would like to add some text this would be greatly appreciated.

The plan is to submit the manuscript as a Short Communication to Eurosurveillance at the end of next week!

Please send us your comments by **Wednesday 16 September**. If we do not hear from you, we will assume you do not want to be a co-author.

Kind regards,

(10)(2e)
