

Moet je bij het blokje geleerde lessen de bron vermelden? $(10)(2e)$ en $(10)(2e)$

Met vriendelijke groet,

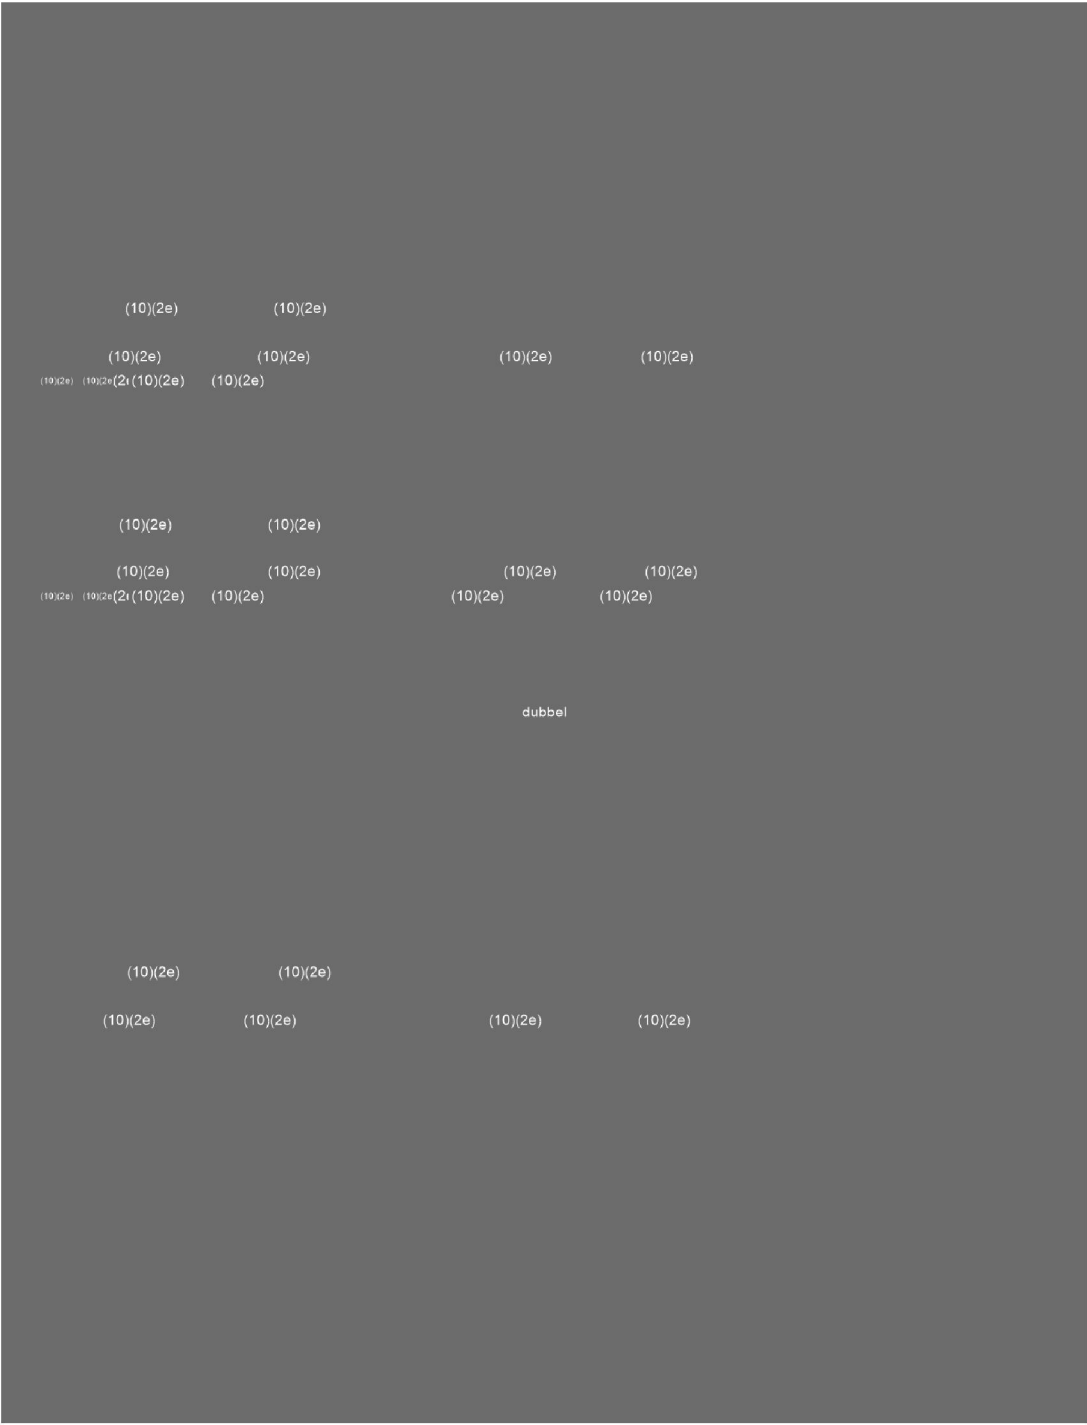

(10)(2e)

The diagram illustrates the decomposition of tensor products of representations of the Lie algebra $\mathfrak{so}(2,1)$. The representations are labeled as $(10)(2e)$ or $(10)(2e)$ with a subscript, indicating the weight of the representation. The decomposition is shown as a direct sum of other representations, with the labels in a stylized font.

The diagram is organized into several rows, each representing a different decomposition. The labels are in a stylized font, and the overall layout is organized into a grid-like structure with some labels in italics.

The labels are in a stylized font, and the overall layout is organized into a grid-like structure with some labels in italics.
