

Speaking notes tbv gesprekken DUI en andere landen

- The development of a safe and effective COVID-19 vaccine is one of the highest priorities.
- We are very happy with the global initiatives that have already been initiated, and the pledges countries have made.
- In addition to that, we see that several countries are investing in the development and production of vaccines on a national level.
- Under the right requirements this can contribute to increasing global capacity;
- Increasing capacity and ensuring access to vaccines are key to effectively fight this pandemic
- We believe that maximizing our commitment is critical and are interested in what initiatives your government considers most important.
- We feel that it is also important to join forces, if this makes it possible to enhance production.
- With regard to this we would like to know if you are willing to cooperate further in the realization of production capacity.
- Perhaps we can explore a joint investment in promising initiatives that would be willing to work with a number of countries in building extra production capacity, given the very strong demand in case of success.

- There are several initiatives we would like to discuss in this regard, and are also very interested in the opportunities that you see.
- Perhaps we can draft an agenda to discuss in further meetings to come.
