[2020-05 Subsidiemonitor.docx](#)

Dear colleagues of *Circulatory Health*,

For your convenience you will find below (also as attachment) the fifth overview of potentially interesting calls/awards/prizes, which are currently open for submission or to be expected (the gray shaded boxes represent new calls/awards/prizes additional to previous 2020 subsidiemonitors):

Call	Description	Submission deadline
Rubicon 2020-1	Rubicon offers talented researchers who have completed their doctorates in the past year the chance to gain experience at a top research institution outside the Netherlands, as international research experience is likely to be an advantage at a later stage in the applicant's academic career. Rubicon is open for all scientific disciplines for a research project at a foreign research institute. For certain typically Dutch topics, there is also a limited opportunity to apply for a research period at an excellent Dutch research institute. However, preference will be given to researchers who apply for a grant to spend time outside the Netherlands. More information for this call here .	May 12, 2020 (14.00 hr)
ZonMW COVID-19: bottom up	Target area 1: 1. Treatment; 2. Diagnostics of contamination; 3. Risk analysis and prognosis; 4. Virus, immunity, immune response and pathogenesis. Target area 2: 1. Organization of care and prevention; 2. Care and prevention for fragile citizens; 3. Transmission and epidemiology. More information on this call here .	May 14, 2020 (14.00 hour)
EUREKA/Health-Holland COVID-19	Within the scope of the EUREKA Programme, a joint call has been launched to fund research and innovation projects aiming to find short and medium term responses to the needs specific to COVID-19. (10)(2a) will be joining this call to fund the joint projects. Top Sector Life Sciences & Health (Health-Holland) provides budget (in total (10)(2b)) for Dutch applicants in this multilateral EUREKA call for solutions for COVID-19 Echo Period – "Life without a vaccine" . In this call, the Netherlands focuses on cooperation projects within the scope of Life Sciences and Health (Health & Care). Companies and knowledge institutions are invited to submit short-term research and innovation projects with their international partner(s) for short-term health and care solutions for the coronavirus (COVID-19). More information on this call here .	May 15, 2020
ZonMW Netherlands-Canada Type 2 Diabetes Research Consortium	ZonMw, the Dutch Diabetes Research Foundation, Health-Holland and CIHR encourage researchers, for-profit private parties and other private parties to apply for a grant for international and interdisciplinary research that will contribute to the battle against type 2 diabetes. The aim of this call is to	May 19, 2020 (14.00 hr)

	accelerate research and development to improve the lives of people with type 2 diabetes in (10)(2a) and the Netherlands by supporting one (1) internationally competitive and innovative Netherlands (10)(2a) Type 2 Diabetes Research Consortium. More information for this call here .	
ZonMW COVID-19: 'Maatschappelijke dynamiek'	Consortia, research groups and individual investigators may propose ideas for research focused on the societal aspects of the corona pandemic and (Intended) measures against it. More information here .	May 25, 2020 (14.00 hr)
ZonMW COVID-19: 'Wetenschap voor de praktijk'	The grant is intended for short-term (action) research carried out by partnerships between scientific organizations (researchers) and companies, civil society organizations, administrative bodies or (local) authorities. The scientific organization must submit the application on behalf of the partnership. Maximum amount (10)(2b) for 6 months. More information here .	May 25, 2020 (14.00 hr)
McDonnell Academy/Washington University	The McDonnell Academy is inviting WashU faculty in any academic discipline to submit proposals in the following focus areas: (1) public health issues stemming from infectious diseases and (2) lasting societal impact of COVID-19 and lessons for future pandemics. As the effects of infectious diseases cross country borders, many of these issues are best addressed in collaboration with international partners. The McDonnell Academy's network of premier partner universities can help to facilitate joint research. Proposed projects must include an international collaborator from any of the McDonnell Academy's partner universities , although they can include other institutions as well (UU = partner University). Preference will be given to projects that also foster collaborations across disciplines. Seed grants are available to support faculty research responsive to this call. Funding up to three proposals at (10)(2b) each and/or up to five proposals at (10)(2b) per one year. More information for this call here .	June 1, 2020
ZonMW Medical Inspirator award	Stimulation award for the most inspiring collaboration between patient, patient organisation en researcher, preferentially with healthcare providers and companies. The price is meant for a research project targeting and realizing the research need(s) of patients. The winner receives (10)(2b); the numbers 2 and 3 respectively (10)(2b) and (10)(2b). Ten percent private co-financing required (in cash or natura). More information about this award here .	June 2, 2020 (14.00 hr)
Dutch Heart Foundation Dekker fellowship for Clinical Established Investigator	These fellowships offer medical specialists, combining their clinical tasks with research on cardiovascular diseases, the opportunity to expand their research group. Many of these researchers will get the opportunity to grow into a professorship. More information for this call here .	Originally June 2, 2020 (12.00 hr); postponed till after summer

Dutch Heart Foundation Dekker fellowship for Junior Clinical Scientist	These fellowships offer young talented clinical researchers the opportunity to start their own research in preparation of a career in which research and patient care are combined. More information for this call here .	Originally June 2, 2020 (12.00 hr); postponed till after summer
Dutch Kidney Foundation Collaboration grant	To stimulate collaboration between social/behavioral scientists and medical researchers. The aim of the collaboration is to tackle a question important from patient perspective. The patient perspective guides the project topic, objectives and performance. Projects are dedicated to make a difference for the patient. In addition, projects are aiming to achieve more translational impact in order to improve kidney patient care and/or prevention of (progression of) chronic kidney disease. Total budget for this call is (10)(2b) - for one grant. More information for this call here .	June 15, 2020
Dutch Kidney Foundation Kolff research preproposal	Within the Kolff program personal grants are offered to support talented postdocs and MD-researchers during the different phases of their scientific career. Recipients of a Kolff personal grant are investigators providing a real contribution to the strengthening of kidney research and to the application of research results in medical practice. Total budget is (10)(2b) More information for this call here .	June 15, 2020 (for pre-proposal)
ZonMw Open Competition	ZonMw Open Competition is intended for excellent research teams to innovate their lines of research in terms of content and collaboration. The aim is to create space for team science leading to synergistic, groundbreaking science of exceptional quality in the (border) area of fundamental research into health care and innovation. More information here .	June 16, 2020 (14.00 hr)
Clinical Fellows (ZonMw)	A clinical fellowship is a personal stimulation grant for a specialized clinical PhD who wants to combine clinical work with scientific research. The fellow can start with this fellowship his/her own research line. The program is meant for clinicians at the beginning of their scientific career and not forestablished investigators. More information for this call here .	June 18, 2020 (14.00 hr)
ZonMw Innovative Medical Devices Initiative (IMDI) 'Technologie voor bemensbare zorg: demonstratieprojecten'	To generate impact of medical technical research on society it is important that application of research results actually occurs. In a lot of cases evidence lacks that medical technology actually contributes to accessibility and affordability of healthcare, with preservation of quality. Total budget (10)(2b) for maximally 15 projects. More information for this call here .	June 30, 2020 (14.00 hr)
KNAW Early Career Award	The KNAW Early Career Award is intended to showcase talented PhD graduates, and to provide them with support and encouragement. The Award is aimed at researchers at the start of their career who are capable of developing innovative and original research ideas. A maximum of twelve Awards are presented each year, divided among the four Academy domains. The KNAW Early Career Award consists of a sum of (10)(2b)	July 1, 2020

	euros, made available from the Academy Fund, and an artwork. The money may be spent at the discretion of the winners on their own research careers. More information for this award here .	
UU - Fostering Open Science practice fund	The Open Science Programme has a fund for research teams that want to do research according to Open Science principles. The goal of this fund is to give research teams the opportunity to work in accordance with Open Science principles, promote Open Science practices and give room for experimentation with Open Science principles. The selected proposal will allow a research team to spend a modest sum in order to make various aspects of their research open. These pilots may entail risks; a chance of failure of making the research according to Open Science principles is considered acceptable. Applications for funding of a minimum of (10)(2b) up to a maximum of (10)(2b) More information here .	July 1, 2020
Dutch Kidney Foundation Innovation call for proposals	For projects that establish innovations. Successful projects have a large impact on e.g. the quality of life of (future) kidney patients, the prevention of (worsening) kidney damage or kidney research. Focus of judgement will be on the innovative and originality of projects. De DKF accepts a higher risk of failure of the research hypothesis. Total budget is (10)(2b) . More information for this call here .	July 27, 2020
Human Frontier Science Program postdoctoral fellowships	The HFSP fellowship program supports proposals for frontier, potentially transformative research in the life sciences. Applications for high-risk projects are particularly encouraged. The projects should be interdisciplinary in nature and should challenge existing paradigms by using novel approaches and techniques. Scientifically, they should address an important problem or a barrier to progress in the field. HFSP postdoctoral fellowships encourage early career scientists to broaden their research skills by moving into new areas of study while working in a new country. More information for this call here .	August 8, 2020 (expected)
UMC Utrecht <i>Circulatory Health</i> seeding grants	For the development of "out-of-the-box" ideas into a potential research line. The proposed research must fall within one of the research focus themes of <i>Circulatory Health</i> and has to increase the connection between departments and/or disciplines. Specifically meant for researchers in the category PhD candidates up to and including associate professors. Maximum amount: (10)(2b) per grant; maximally 4 grants. More information and the application form for this call here .	August 15, 2020 (17.00 hr)
DCVA CVON DOSIS and CVON ARENA-PRIME Young Talent grant	In the framework of the Dutch CardioVascular Alliance (DCVA) CVON DOSIS and CVON ARENA-PRIME are together putting out a call for Young Talents to allow them to apply for funding for innovative and insightful research related to cardiomyopathies. The grant will provide up to (10)(2b) to be spend on a 9-12 month research project. During this period the hostlab is expected to provide additional funds to match the	August 15, 2020

	salary/benchfee. National applicants are stimulated to explore opportunities to perform their research abroad, although the proposed research can also be performed in their current labs. All (inter)national postdocs or PhD students are eligible to apply. More information here .	
'Humane meetmodellen 2.0': for health research towards disease and prevention (NWO)	The aim of the program 'Humane meetmodellen' is to stimulate the development of new and more efficient human measuring models for health research in order to improve and accelerate the applicability of research results. The focus of this second call is on the development of human measuring models for research towards disease and prevention (including toxicology research). The results should be applicable for multiple diseases or have impact on multiple patient groups. Per project (10)(2b) euro can be requested. More information for this call here .	August 16, 2020 (expected); please check website regularly for updates
ERC Advanced grant (Call opens May 14, 2020)	Applicants for the ERC Advanced Grants - called Principal Investigators (PI) - are expected to be active researchers who have a track-record of significant research achievements in the last 10 years. The Principal Investigators should be exceptional leaders in terms of originality and significance of their research contributions. No specific eligibility criteria with respect to the academic requirements are foreseen. Advanced Grants may be awarded up to (10)(2b) for a period of 5 years . (pro rata for projects of shorter duration). For more information look here .	August 26, 2020 (expected)
Rubicon 2020-2	Rubicon offers talented researchers who have completed their doctorates in the past year the chance to gain experience at a top research institution outside the Netherlands, as international research experience is likely to be an advantage at a later stage in the applicant's academic career. Rubicon is open for all scientific disciplines for a research project at a foreign research institute. For certain typically Dutch topics, there is also a limited opportunity to apply for a research period at an excellent Dutch research institute. However, preference will be given to researchers who apply for a grant to spend time outside the Netherlands. More information for this call here .	September 1, 2020 (14.00 hr) (expected)
ZonMW Open mind (Call opens around May 21, 2020)	Open Mind invites investigators, with the 'people, planet, profit'-idea in mind, to propose out-of-the-box research ideas that contribute to creative and sustainable solutions for societal challenges. In Open Mind the emphasis is on new and unconventional ideas that have not been investigated before by the applicants and not studied before. Budget is (10)(2b) per grant for maximally one year of research. More information for this call here	September 8, 2020
Multidisciplinary Consortia 2020 (ZonMW) – Pluripotent Stem Cells for Inherited Diseases and	This call is directed at knowledge development for (the treatment of) serious inherited diseases and embryo-like structures with pluripotent stem cells. Societally responsible innovation is an important aspect within the projects. More	September 8, 2020 (14.00 hr)

Embryonic Research	information here .	
ERC Proof of Concept call	For principal investigators that have already received an ERC grant for their frontier research project, that is either ongoing or has ended less than 12 months before January 1 st , 2020. For exploration of the commercial or societal potential of their work. The principal investigator must be able to demonstrate the relation between the idea to be taken to proof of concept and the ERC frontier research project (Starting, Consolidator, Advanced or Synergy) in question. More information for this call here .	September 17, 2020
Health Holland Match PPP call	With the ongoing Match Call, PPPs are invited to apply for PPP Allowance. The proposed project applications must contribute to one of the five missions that have been proposed by the Dutch Ministry of Health, Welfare and Sports and are explained in detail in the Knowledge and Innovation Agenda 2020-2023 of the Top Sector LSH. All applications are evaluated by an evaluation committee at two set moments per year and the board of the Top Sector LSH decides if an application is honoured. More information about this call here .	October 7, 2020
EACVI Research Grants	The European Association of Cardiovascular Imaging (EACVI) offers one-year Research Grants of ^{(10)(2b)} to help candidates under 40 years old in obtaining research experience in a high standard academic centre in an ESC Member country other than their own. More information here .	Open from March 31 to October 2020
HHINT Kickstarter for PPP	The Top Sector LSH wants to stimulate international, public-private partnerships (PPP). Current financial instruments for cooperation outside Europe are limited. To facilitate the first steps to R&D cooperation worldwide, the Top Sector LSH established the programme 'Health-Holland International (HHINT) Kickstarter for public-private partnerships'. With the HHINT Kickstarter, for profit enterprises and recognised research organisations are invited to apply for financial support (PPP Allowance) to get off to a flying start to establish a long lasting foreign public-private partnership in R&D. This PPP Allowance serves as a first driver in international R&D cooperation between the parties. More information here .	Continuously between 1 April to 1 November 2020 17.00 hr)
Precall: Research of Education	Solely for applications concerning General and Elderly Medicine. For contributions to the development of new knowledge relevant and applicable to advanced training in General and Elderly Medicine.	November 2020 (expected)
Rubicon 2020-3	Rubicon offers talented researchers who have completed their doctorates in the past year the chance to gain experience at a top research institution outside the Netherlands, as international research experience is likely to be an advantage at a later stage in the applicant's academic career. Rubicon is open for all scientific disciplines for a research project at a foreign research institute.
