Dear Dr (10)(2e)

as a response to the unprecedented pandemic caused by COVID-19, (10)(2a) Science Foundation has launched a thematic Call for Scientific Research Proposals named **Infectious Diseases Caused by Corona Viruses and the Social and Educational Aspects of the Pandemic** with several aims: to better understand biology and patogenesis of SARS-CoV-2 and COVID-19; to understand Management Crisis during and after the Pandemic and to understand and improve education and e- learning/distance learning in terms of the Pandemic.

(10)(2a) Science Foundation is looking for experts to act as peer reviewers for evaluating project proposals and, based on our research and recommendation of our expert review panel, your expertise and experience are considered invaluable in assisting with this peer review. We would kindly ask you to review a project proposal by (10)(2e) **“Work Precariousness in (10)(2a) in the times of COVID-19 Economic Crisis”** submitted under the Research Topic 3.1. **Psychosocial consequences of emergency measures in the control of the COVID-19 pandemic, resilience and risk factors for mental health and well-being of the general and vulnerable population**. Attached, please find additional information. If you accept this invitation, you will receive an e-mail with full project documentation.

We kindly invite you to let us know if you are interested in taking part in this Call for Proposals peer review. Recognizing the challenges that our medical and scientific community are facing, various measures will be implemented to reduce the burden on peer reviewers (both time and effort) so we would like to emphasize that project proposals are very short.

If you are available and willing to participate in the evaluation process as a reviewer, we would be very grateful if you could inform us about your decision at your earliest convenience. Your contributions will be most appreciated as we meet the challenges posed by this pandemic. Please note that the reviewers of project proposals submitted to (10)(2a) Science Foundation's Calls for Proposals do not receive remuneration for their work.

Should you accept our invitation, please note that the expected date of submission of your review is within a **two weeks deadline, June 5st**. If for any reason, you are unable to assist us in this matter, your recommendations of other experts who you consider to be competent to review this proposal would be very much appreciated.

We would also like to inform you that all reviewers are required to respect the confidentiality of all materials and information provided for the purpose of project proposal evaluation. The material from the application should not be copied, quoted, or used otherwise, nor discussed with people who are not involved in the selection process and evaluation of project proposals.

In accordance with the **“Statement on the Prevention of the Conflict of Interest in the Evaluation Procedure”** (attached), please be so kind and inform us if you are in conflict of interest (real or perceived) or shortly declare that you are not in conflict of interest with this application.

Please do not hesitate to contact us if you need any additional information.

Thank you in advance for your consideration.

With kindest regards,

(10)(2e)
