Could I ask you to investigate whether there are producers and/or production facilities of these gloves located in your country? Once identified, the colleagues at EZK will contact these producers to assess whether they can produce additional gloves to support Dutch medical staff.

Please note, several millions of these gloves are used in the Netherlands weekly, therefore we are looking for experienced producers that have quality certifications according to ISO and CE standards and preferably have experience producing for the EU market.

The table and further information below contain the specifications of the gloves Dutch hospitals normally use. We are therefor looking for these products, or equivalent ones.
