Dear 5.1.2e, 5.1.2e, 5.1.2e, 5.1.2e and 5.1.2e,

Thanks all very much for the help in planning a series of protein productions @ AMC while we are still setting up our 293F cell system at RIVM.

I have planned 6 RBD transfections tomorrow, so that would mean purifications on Wednesday/Thursday next week.

5.1.2e, is it correct that you recently purified RBD? Would it be possible to share the protocol on how you did the purifications?

Are there any vacant shifts within the Env/Ab group for next Wednesday or thursday? I also asked what is available in the flu group.

5.1.2e, is it ok that 5.1.2e help me with the purifications?

Thanks all!

5.1.2e

ps attached our Perspective on these RBD substitutions as accepted in Virus Evolution
