Hoi (10)(2e)

Onderstaand de punten die ik met input van (10)(2e) en (10)(2e) uit het SPD heb gehaald. Alvast een voorzetje gedaan in het Engels. Laat maar weten of ik iets moet toevoegen of aanpassen. De deadline voor input doorgeven is morgen cob.

- We strongly support that the lessons learned from the COVID-19 pandemic will be broadly incorporated in the SPD. It is important that these lessons learned are thoroughly incorporated in the strategic objectives, especially in emergency preparedness and the response to cross-border health threats. It is not only important that the lessons learned from after-action reviews will be incorporated, recommendations from the external evaluation of the COVID-19 response need to be implemented as well
- On p.13 is stated that improvements on the EWRS will be implemented, based on the need of MS. How will the MS needs be assessed? The lessons learned from the COVID-19 pandemic need to be taken into account in identifying the needs for improvements as well.
- We are happy to see that priority is given to tackle AMR, as well as ECDC's support on the One Health Action plan against AMR. On p.14 is stated that an important part of the effort for addressing future knowledge gaps and trends is the area of environment, as one possible driver for communicable diseases. Will this include AMR as well?
- It is very positive that section 3.1 (p.14) takes, besides global warming, other factors is taken into account as well; eg. deforestation, urbanisation and displacement of wildlife. In NL we aim to be alert on side effects of environmental policy on infectious diseases and try to anticipate on the impact on infectious diseases beforehand. We fully support the ECDC in working on identifying gaps in this field
- P.16 emphasis is put on increased collaboration with major CDC. We believe that collaboration with national public health authorities of MS could be more present in the SPD, eg. general priority 2, strategic objective 2 and 3,1

Verdere aandachtspunten: Hele sterke focus op versterking van surveillance, lijkt me positief gezien de ervaringen tijdens COVID-19, maar de implementatie hiervan is ook afhankelijk van geleerde lessen uit COVID-19 (+ de discussies die nu spelen rondom versterking van het ecdc). Verder is er aandacht voor vaccinatie weigering, voor ons interessant in elk geval om ervaringen uit te wisselen. Wel heel afhankelijk van de nationale context

Groet (10)(2e)
