Dear (10)(2e)

Thank you for the update from Denmark, the situation with you is very informative for all the decisions about slowly lifting measures here. Last week has been unexpectedly horribly busy, apologies for not getting into contact sooner. We have completed a preprint on the observed contact patterns in the Netherlands before and after the lockdown (see attachment). Hopefully soon on (10)(2g) Not sure if this is of any immediate use to you; we found it useful to calculate our way out.

Best
