Dear all,

Please find attached the preproposal about Risk Communication and Corona, I submitted last monday.

I could not list most of you as project member, because your organisation was not listed in the database of ZonMw. Therefore I mentioned the consortium in section 3 and added an attachment with CVs (not sure if this appendix is allowed). I mentioned the Robert Koch Institute in section 5.

Also the budget is only a rough estimate and not specified,

If we are selected to work out a full proposal a detailed budget is needed and I assume I can add you as project member.

We will receive the decision of the committee around June 18.

Thanks again for all the comments and let's hope we are allowed to work out the preproposal

All the best
