Dear (10)(2e)

I am a colleague of (10)(2e). She forwarded me the minutes of yesterday's meeting of the Cross Border Taskforce Corona. In that meeting (10)(2e) mentioned that we are developing a COVID-19 dashboard and that we would appreciate it to have talks with Germany and Belgium.

In the annexes you find some more information about the topic (relevant paragraph from a letter to Dutch parliament and the more precise questions we are having).

As we have learned thus far Germany has a Corona Dashboard from the Robert Koch Institute. That is a good example. But we lack some knowledge. For instance how this Dashboard is being used by the German government or by that of the Bunderländer or if there are markers for the indicators that Germany is using that can help COVID-19 policymaking.

If convenient, I would like to get in contact with you to see if we could arrange a (virtual) meeting where we could discuss COVID-19-Dashboards and the practical and political use of it.

And may be as a result of that explore options of cooperation/sharing ideas concerning the improvement in the use of a Dashboard.

Looking forward to your reply.

Best regards

(10)(2e)
