20200522 Concept presentatie IAO toerisme - aanvullingen WWS.pptx

ha (10)(2e)

ik begreep dat je ons in dossier toerisme gaat helpen! fijn! (10)(2e) heeft al heel veel gedaan, maar het is nogal kluif erbij!

zie hier stuk (10)(2e)

The diagram illustrates a complex, branched chemical structure, likely a dendritic molecule. It features a central core from which multiple chains radiate outwards. The chains are interconnected by various functional groups, including hydroxyl groups (-OH) and methyl groups (-CH₃). The overall structure is highly symmetrical and complex, with many repeating units. The diagram is rendered in a 3D perspective, showing the spatial arrangement of the atoms and bonds. The functional groups are clearly labeled, and the structure is highly detailed, showing the connectivity between different parts of the molecule.
