Trusted certificates for Corona tests and vaccinations

CONNAXIS | Coronaverificatie.nl | Coronavirustest.nu

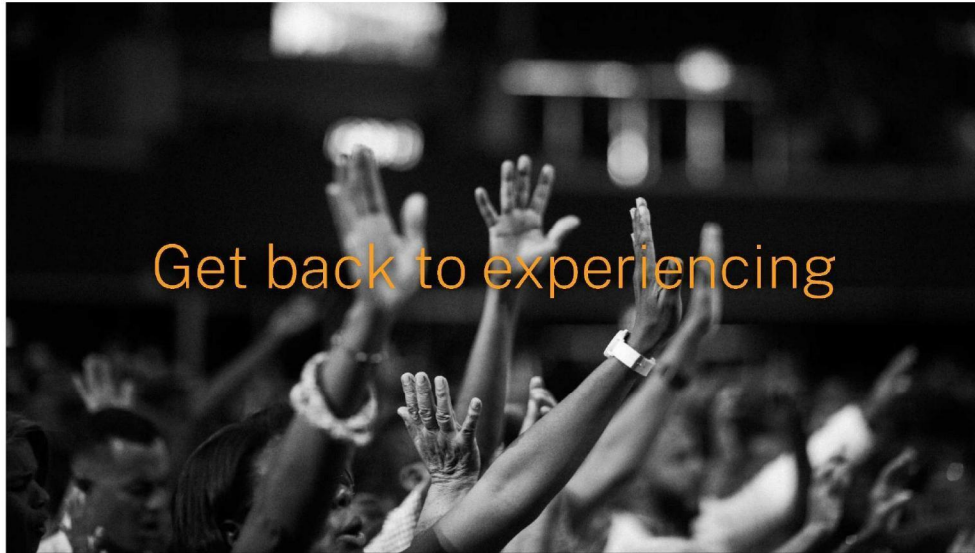

Introducing Coronaverificatie.nl

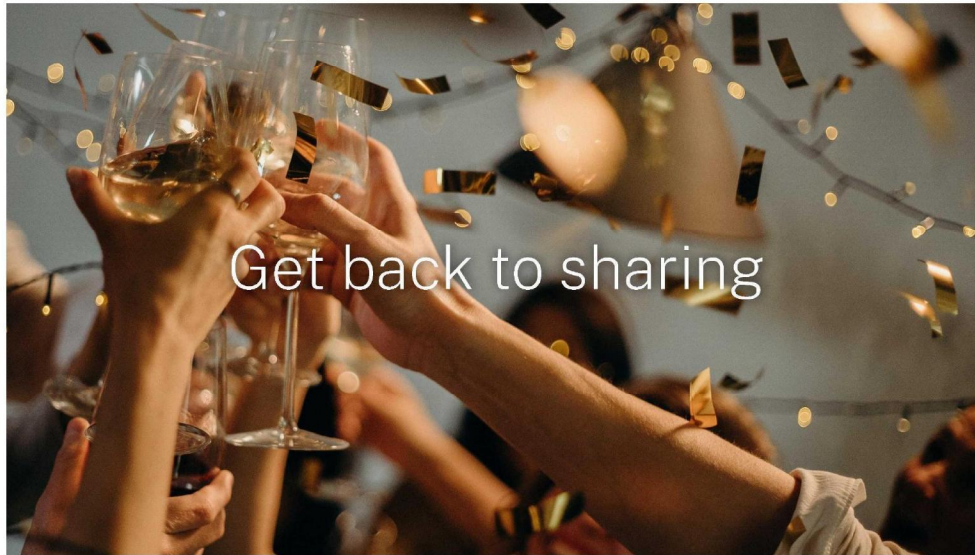

A revolutionary and secure privacy-preserving solution for individuals to get and to certify their vaccinations.

Our Vision

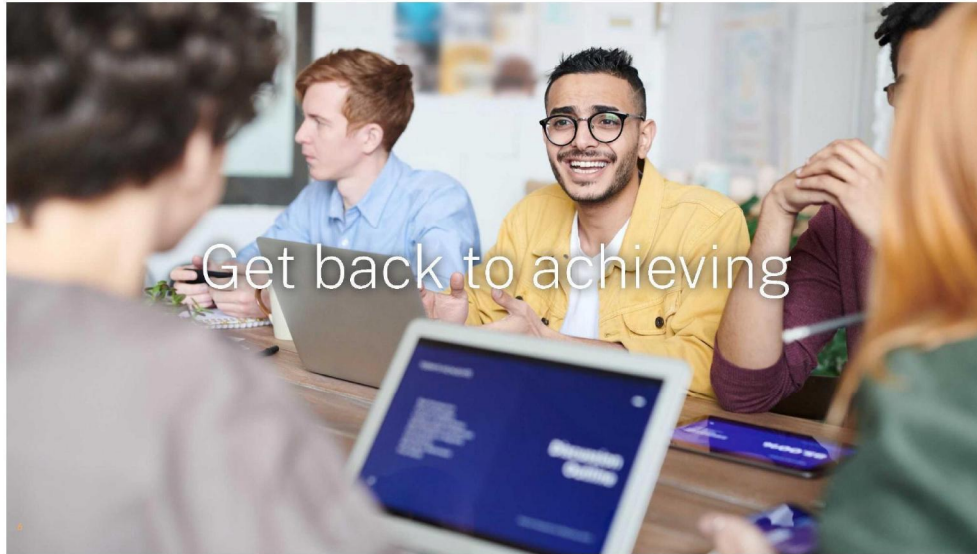

Our vision is to get the world **moving** and **growing** again, quickly and confidently—helping people **continue to engage with life** and pursue their dreams.

Get back to living life again
the way you intended

Easy, secure, and trustworthy

A standardized and encrypted system that prioritizes the safeguarding of personal information.

Revolutionary self-sovereign identity and blockchain technology that keeps your data safe: your medical information stays with **you**.

A beneficial system for individuals and organizations

It's a near-effortless way for participating **individuals** to show their vaccination status when needed.

It's a quick and reliable way for participating **businesses and organizations** to verify someone's vaccination status.

Our goals

- To have widely-recognized **commercial test and vaccination centers**
- To offer trusted and standardized **test and vaccination credentials**
- To provide individuals and companies **secure technology**, and **simple reliable methods** to **verify health and vaccination credentials**
- To accelerate the process of **generating trust**
- To engender trust and **empower people with security, privacy and control over their personal data**
- To — as quickly as possible — open up the economy and get people back to the business of fully living their lives

With our **reliable, inclusive, privacy-driven system** for vaccinations and verifications, we can accelerate the rebuilding of trust and confidence needed to open up our economy again.

Collectively, we can contribute to **increasing social trust**, and **getting ourselves back to the business of life**.

Product: Mobile app

Coronaverificatie.nl app for managing, sharing and verifying credentials

- Free for anybody to download and use
- Customize your privacy settings & confirm what data you share
- A privacy-prioritized solution

- Easy for businesses and organizations to quickly verify someone's vaccination credentials

Product: SmartCard

Coronaverificatie.nl SmartCard:
present your credentials without a
smartphone

 coronaverificatie.nl

17

**Get tested or
vaccinated**

**Hold credentials on
your app**

**Get verified at
the entrance**

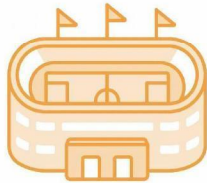

Get tested or vaccinated at any one of our many participating testing centers; find them listed on our site: coronavirustest.nu.

See your test results and your vaccination history in the app; customize your privacy and visibility settings.

See all businesses, vendors and venues in your area that accept [Coronaverificatie.nl](https://coronaverificatie.nl).

Show your app at the door and you're quickly inside: your QR code is easily scanned at venue entry points and business entrances.

Considerations

Regulatory

Compliance with:

- AVG/GDPR privacy legislation
- Government directions regarding COVID-19

Business

- Uncertainty regarding COVID-19 government directions
- Uncertainty regarding timing and available quantities of commercial corona vaccinations
- Current relatively high-cost tests compared to location expenses

Innovative technology

Self-sovereign Identity & DID

- Self-sovereign identity (SSI) is a term used to describe the digital movement that recognises that an individual must own and control his identity without the intervention of administrative authorities.
- Decentralised Identity

Blockchain

A blockchain is used to record and verify that certain credentials have been issued to a particular user, without the identity of the user becoming public.

Smartcard

The smart card is an alternative to the app. Test and vaccination data can be written down and read out on the smart card.

Development team

Company	URL	Responsibility
 CONNAXIS STAY COMPETITIVE	connaxis.com	Product owner, coordination and communication
 GIMLY	gimly.io	Product definition and design, Software development (Mobile application, web app, blockchain and SSI functionality), Smartcard provider
	sphereon.com	Lead technology partner of Gimly: underlying blockchain technology and SSI components
