

Diagram illustrating a 2D hexagonal lattice structure with 10 sites. The sites are arranged in two rows of five. The top row sites are labeled $(10)(2e)$, $(10)(2e)$, $(10)(2e)$, $(10)(2e)$, and $(10)(2e)$ from left to right. The bottom row sites are labeled $(10)(2e)$, $(10)(2e)$, $(10)(2e)$, $(10)(2e)$, and $(10)(2e)$ from left to right. A central site is labeled 'Dubbel'.
