Re: Sale of Fake Pharmaceutical Product for Covid-19

We would like to notify you that we have just been made aware that a fake pharmaceutical product allegedly for use in connection with Covid-19 is fraudulently being advertised and apparently sold in South America with the logo of our institute and with the following wording: "Covid-19 Vaccine Tracker. Cutting Edge Israeli Biotech Innovating Coronavirus Immunotherapy Treatments." We attach to this letter a picture, provided to us today, of the fraudulent product.

As you may be aware, Migal, through Migvax Ltd. is developing an oral Covid-19 sub unit vaccine. The aforementioned vaccine is not yet commercially available, clinical trials have yet to be performed, and regulatory approvals for commercial sale have not yet been obtained.

Migal Galilee Research Institute Ltd., Migvax Ltd. and their affiliates have no connection whatsoever with the fake product in the photograph and know nothing about it. Migal's name and logo have been used without its knowledge or permission in order to defraud the public.

In light of the above, the safety risk that this product may pose, we kindly request your assistance through your related agencies in notifying all appropriate bodies of the fraudulent distribution of the product in order that appropriate action can be taken to protect the health and safety of the South American public. I am available to provide any assistance you may require in this endeavor. We thank you in advance for your assistance.

Sincerely,

A handwritten signature in blue ink, appearing to read "David Zigdon".

David Zigdon,
Migal Galilee Research Institute, Ltd.
