7 April, 2020

Dear Mr. (10)(2e),

The Corona virus crisis is becoming very threatening.

The urge to inform you all is strongly increasing. DNH Research is a medical clinic. The clinic has proven itself worthy for over 35 years, we have treated many patients with our Ultra Molecular Frequency therapy (UMF). This is scientific proven.

Important to understand is that every approach is in fact a research for the frequencies of the body that are different in illness in the patient. We developed a method to find which frequencies are in that body different from normal. Then we search for the disposed frequencies and in what material it is to be found.

Our great recovery is that you can find the direction of the frequency that you need in this way. In the test you see in that case little differences, than you know the solution is in that frequency field, in that kind of material.

Then we discovered that if you decrease that material in size, the influence gets bigger. We decrease the particles of the material to UMF sizes up to Ultra Molecular measures. This UMF size is in fact the strongest influence you can produce. In fact that is what we do, not homeopathic but simple decrease the material into smaller and smaller particles. We produced in this way over a thousand very effective frequency combinations. They are 100% effective, they have an overkill of 600%.

We tried to inform our National Health Organization, the RIVM, several times. They were not interested at all.

In February we made the decision to get in contact with the Chinese Embassy in Holland. They were very interested in our work and have set up a meeting.

The Corona virus crisis is so threatening that I think it is necessary to let you know that we developed a treatment that can kill the virus. It is a total new approach without any side effects.

To my opinion, based on our results, the treatment Cor.V UMF is a 100% solution in a rather short period of time, one to two weeks.

As soon as patients are diagnosed with Covid 19 the treatment should be started but also later on in the process.

Even the most severe patients might be saved depending of course to the degree of illness. You should try anyway.

We could save the lives of thousands of people.

We must start with this effect to break the crisis, save lives and restore economy.

As soon as people, we, you, everybody, know there is a treatment, it will be a relieve to the world.

Cor.V UMF is available in granules. Twice a day 10 granules sublingually.

Description Cor.V UMF

Cor.V UMF is a treatment with Ultra Molecular Frequencies.

These selected frequencies can correct the wrong frequencies in the patient.

It neutralizes the sours of these frequencies.

The neutralized product is expelled by the immune system. This expelling process is another boost for the immune system to get rid of the virus. Nature is very inventive.

Yours faithfully,

(10)(2e)

P.S. We don't realize that regular medicine do the same.
