45-54							
55-64							1
65-74							
75-84							1
85 and above							1
age missing							
Proportion of males among the new confirmed case deaths – calculated as the number of new confirmed case deaths in males, divided by the total new confirmed case deaths for which sex is known						UNK*	0.33

\* Case registers are not been updated on a daily basis, therefore a lot of information is missing. We did receive daily updates on current hospital admissions, but these do not provide definitive information on the total cumulative hospital admissions as discharges have not always been reported.

\*\* including cases with missing age or sex from last week

\*\*\* Case registers are not been updated on a daily basis, therefore a lot of information is missing. For Curacao, the number of new cases for which sex is known is very low.
