The form is light blue and contains a header with the title 'Sužinokite apie testą ir būklę' and its English translation 'Check the test and status'. It features an image of a 'C19safecard LITHUANIA' with detailed text in Lithuanian, English, and small text. Below the image are two input fields for 'Kortelės saugos kodas' (Card security code) and 'Asmens kodas' (Personal ID number). A 'Pateikti! Submit' button is at the bottom.

Voluntary registration of test or vaccination
for own use-travelling or at home

C19 PASSPORT system provides the individual countries the trust to allow test result to be used as a proof.

Only authorized institutions can register the test or vaccination.

Only the individual controls when and why to show the data online.

Only countries can give group custom recommendations on basis of secured test sites, type of test and result.

All countries can recognize the system.

lakameda+

Authorized institutions and companies

Authorized institution performs test and keeps journals as normal.
C19PASSPORT is additional registration on behalf of the customer.

INSTITUTION LABEL with anti-tampering functionality and web access to register are provided only to institutions with several safety measures.

Test type, result, personal ID and Codes from Card / Label are registered online. Institution can not receive, enter or change any information after submission. All data are irrevocable hashed/encrypted.

INSTITUTION LABEL is attached to C19Safecard and handed out.
Card and its codes are essential key to be able to read (and delete) data for customer.

Institution is reimbursed for each activated registration.

Possibilities for countries

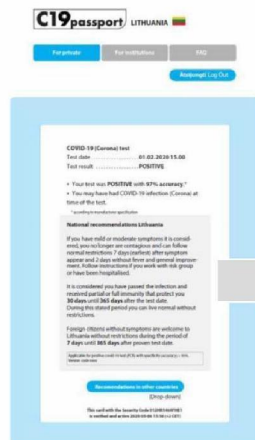

Legal basis that performed the test and registered data, together with the security in C19PASSPORT make it trustworthy.

The database structure of test type/vaccines gives national authorities the unique possibility to utilize group custom recommendations to the individuals- in real time.

Recommendations can allow less or more restrictions than general to the individual. Regardless if they are national or foreign citizens.

C19 PASSPORT are self financed, open for all nations to recognize and use.

Voluntary registration for the individual- who pays for the registration and gives consent for the storage of data.

Authorized institution registers and activates the card. Only Personal ID as personal data is stored but irrevocably hashed.

The individual with the codes is the only one able to retrieve the test result and if wanted remove the registration.

System will be internationally launched during summer.
Authorization of institution starts in Lithuania and Sweden. Other countries follows in order of interest.

C19Safecard will be available at pharmacies or at the authorized institution.

lakameda+

Card is just a key with verification features and codes to enter the database.

Data storage is secured on highest level and will be stored 10 years after issuing.

C19safecard can only be activated by an authorized institution.

Data is not accessible for ANYONE - it can only be accessed online by individual or other authorities with cardholder's permission.

Test and the result are fixed, but national recommendations are subject for updates and may differ in time.
