Subject: AW: EU/EEA NITAG Collaboration WG 3 - LSR on COVID-19 vaccines - Protocol and TOR for comments

Dear all,

please find attached the revised version of the protocol. A few explanations:

- 1) Investigation of immunogenicity would go far beyond the scope of our review and beyond the resources we can invest here. In addition, immunogenicity is captured in a Cochrane Review which will be conducted by Cochrane France for WHO.
- 2) With regard to safety outcomes, this also applies to Phase 1/2 studies.
- 3) We changed the starting date to 01 January 2021.

Please have a look and send any final comments by tomorrow (25 Nov).

Best,

5.1.2e

Betreff: RE: EU/EEA NITAG Collaboration WG 3 - LSR on COVID-19 vaccines - Protocol and TOR for comments

Sorry for not being able to respond sooner. I've just got 2 suggestions, tracked over [redacted] latest version with other's comments.

Kind regards,

[redacted]

 Subject: RE: EU/EEA NITAG Collaboration WG 3 - LSR on COVID-19 vaccines - Protocol and TOR for comments

Dear [redacted] and members of the WG3,

Please find my proposed edits in the attached document. Please also consider to follow the template made last year for the influenza vaccine SR to be found here: https://www.crd.york.ac.uk/prospero/display_record.php?RecordID=156800
<https://www.crd.york.ac.uk/prospero/display_record.php?RecordID=156800>

I do note that there are a number of suggestions from WG members, which is highly appreciated, and I am wondering if you would be able to review proposed edits and update the protocol and resend it out for a final view of those that wish to see it once more, like me. [redacted] will come with some last comments tomorrow morning and then the ECDC comments are done.

With kindest regards,

[redacted]

Dear WG3 members and observers

I hereby send my comments and notes to the LSR.

I have used the same document as [redacted] and [redacted]

Thank you

Best regards

Also as a side note if you have not seen it already, FYI a link to this Lancet paper published today on Safety and immunogenicity of ChAdOx1 nCoV-19 vaccine administered in a prime-boost regimen in young and old adults(COV002): a single-blind, randomised, controlled, phase 2/3 trial: <https://www.thelancet.com/action/showPdf?pii=S0140-6736%2820%2932466-1>

We look forward to hearing from you soon.

Thank you.

Kind regards,
